

STREETPRINT 293-0550
ASPHALT.BM

We are patented

Bermuda's only licensed applicator for the Streetprint decorative asphalt process.

Streetprint is a finishing system designed specifically for asphalt. The two part process involves the patterning of the asphalt surface into "paver" type patterns and then followed by the application of a hard wearing coating, which beautifies and protects the asphalt base material

East End Asphalt

Streetprint is available in a wide range of patterns and designs, together with a variety of colours. StreetPrint's cost advantages over alternatives such as brick, stone or stamped concrete are significant.

visit www.integratedpaving.com for more information

Streetprint coatings, unlike other similar products, uses polymer-based pigments with a much higher UV stability. This in turn provides a continuous, flexible, skid resistant surface impervious to water penetration, diesel, oil and chemical spills.

Quick installation, durability, easy maintenance and design flexibility make StreetPrint the product of choice for many projects. StreetPrint combines the flexibility and strength of asphalt with leading-edge coating technologies

There are several options to consider when laying out your paving job. We can offer brick or paver borders, colouring of the asphalt, or the patented "Streetprint" process which gives asphalt the appearance and colour of brick pavers

We offer a "FIXED PRICE QUOTE", which means that we will always honour our quoted price, and the bill that you get will be the same as the quote. No one will beat our quality, but if you've seen a lower price give us a call first and we'll match it!

And a
2 Year
Limited
Warranty!

We'll match
competing
quotes and
provide top
quality!

East End Fencing
